Docket No.

DAMADIAN 3.0-067 CIP DIV V

Application No.: 09/852,551

IN THE CLAIMS

44. (currently amended) A method of fabricating a ferromagnetic plate for a magnetic resonance scanner magnet frame comprising the steps of:

- directed major surfaces and a thickness between such surfaces into strips, each of said cut strips having a width greater than the thickness of the starting plate and equal to the thickness of the plate to be fabricated, whereby each of said cut strips will have major surfaces has faces which originally constituted parts of the major surfaces of the starting plate; and
- (b) stacking the strips so that major surfaces of the strips abut one another.
